Ms. Marjorie A. Piette
Project Manager
GEO Engineering
150 Mineral Spring Drive
Dover, New Jersey 07801

Dear Ms. Piette:

Reference is made to your letter of request dated January 7, 1997 to Baltimore District, their response by letter dated February 18, 1997, and your subsequent telephone discussions with the New York District staff for permission to access monitoring well MW08 located in Lodi, New Jersey. The well was installed by the Corps of Engineers to collect samples for the proposed Lower Saddle River Flood Protection Project.

Permission is granted for your firm to access the well to survey the well and measure depth to bottom and depth to water in the well, as well as to collect ground water samples for analyses. Prior to accessing the well you must obtain a right-of-entry from the property owner. You should then contact John Brzezinski, Baltimore District HTRW Design Manager, at (410)962-0030 to arrange for the well to be opened.

Sincerely,

Arthur J. Connolly, P.E.
Chief, Engineering Division
